

*MINI PUMPKIN BIRD FEEDERS (Feature: 1119)*

Pumpkin bird feeders are decorative and useful - using harvested pumpkins and sunflower seeds.

## *SYNOPSIS*

Once you've scooped out the edible flesh from these lovely miniature pumpkins, don't just throw them away, they can be used for a number of things including these bird feeders. Create slings to hold suspend them from the trees and pierce holes in them for some branches for the birds to perch on. In this series they are filled with sunflower seeds taken straight from the garden in autumn, giving the birds some vital energy.
