SYNOPSIS

Mosquitos can really ruin your plans to dine outdoors in the summer months. You can buy various chemical repellents but you could also use nature to help keep these winged attackers at bay. This step by step guide gives you some great ideas for repelling plants to combine in an attractive container and keep on your terrace. It looks and smells great too. Plants include *Lavandula angustifolia* 'Little Lady', Sweet Basil, *Cymbopogon*, Rosemary, *Chamaemelum nobile*, Marigold 'Gem Mix', Variegated Lemon Thyme, *Mentha x piperita* and *Nepeta mussinii*
