

***RECYCLED TOOL CHEST USED AS SUCCULENT
CONTAINER (Feature: 1013)***

This lovely container is made using a recycled tool chest but any case or box could be used to similar effect. Using gravel to create a dry garden for succulents makes a decorative container for inside or out.

SYNOPSIS

Succulents do very well in fairly shallow containers and always enhance everything they are included in. This is a lovely idea for planting succulents, an old wooden tool chest filled with soil and stones creates a great feature for your garden.
